Education

GIFT (Autonomous), Bhubaneswar, Odisha *Jul 2022 – 2026*
B.Tech in Computer Science and Engineering with specialization in *Artificial Intelligence* CGPA: 7.2/10

Kendriya Vidyalaya No. 2, IOC Barauni *Jun 2021 – May 2022*
Class XII Percentage: 74%

Technical Skills

- **Languages:** JavaScript, TypeScript, SQL, Python
- **Frameworks & Libraries:** React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS
- **AI & Agentic Systems:** Generative AI, Agentic AI, LangChain, LangGraph, LangSmith, FastMCP, RAG
- **Databases & Tools:** MongoDB, Mongoose, Redis, MySQL, Git, GitHub, Docker, Postman, VS Code, GitHub Actions

Professional Experience

US IT Recruiter *May 2026 – Present*
KGS Technology Group, Private Limited
C2C Staffing, US IT Recruitment, Sourcing, Vendor Management

- Sourced and screened candidates for US-based IT positions, specializing in Corp-to-Corp (C2C) placements across various technology roles.
- Managed the end-to-end recruitment lifecycle including candidate sourcing, resume screening, rate negotiation, and coordination with implementation partners/vendors on C2C contracts.
- Coordinated interview scheduling, offer negotiations, and onboarding documentation between clients, vendors, and candidates for time-sensitive placements.

Internships

Backend Intern *Oct 2025 – Mar 2026*
MoovOn Services & Solutions
Node.js, MongoDB, Express.js

- Built **Taskji**, a centralized Company & Employee Management backend, streamlining organizational data, employee records, and administrative workflows for the internal team.
- Designed RESTful APIs using **Express.js and MongoDB** to handle employee onboarding, role-based data access, and record updates, reducing manual data-entry overhead.
- Collaborated with the team to debug and optimize backend logic, improving API response reliability and reducing recurring data inconsistencies.

E-Commerce Website Intern *Jul 2024 – Aug 2025*
Technoboot Pvt. Ltd.
React.js, Node.js, MongoDB, Express.js

- Built a fully functional e-commerce platform using the **MERN stack**, covering product listings, cart management, and order flow end-to-end.
- Integrated the frontend with Express.js/MongoDB backend APIs for product data, user sessions, and order handling, ensuring smooth end-to-end functionality.

Projects

Smart Inventory Management System
Tech Stack: React.js, Node.js, Express.js, MySQL

- Built a warehouse management system to track real-time stock levels, supplier orders, and product movement logs across multiple inventory categories.
- Implemented an automated low-inventory alert system, notifying admins/staff when stock fell below defined thresholds to prevent stockouts.
- Designed role-based access control for **admin and staff** users to restrict sensitive operations such as stock adjustments and supplier order approvals.

Achievements

- Earned an **NPTEL certification in Introduction to Industry 4.0 and Industrial Internet of Things (IIoT)** and completed a certification in **Cloud Computing**.
- **Runner-Up, Trithon Hackathon 2025:** Awarded among 40+ teams for innovation in **AI-based code analysis**.
